

Managed Detection and Response

Secure your business and patients with affordable enterprise-grade protection

Risk is everywhere in the modern healthcare environment. But, we've got you covered.

Since the introduction of EMR's, healthcare is an "always-on" digital business. The problem is, healthcare organizations have been long plagued by constraints to implementing a resilient cybersecurity and compliance program:

- Talent shortage in Information Security (IS)
- Cost of cybersecurity technology and service
- Competing priorities like treating patients

PatientLock Managed Detection and Response (MDR) helps you eliminate the barriers to better security. Our managed services model makes protecting your modern environment simple, and delivers effective cybersecurity protection in a way that fits your healthcare business – and your budget.

PatientLock MDR

Cybersecurity that improves your security posture and compliance

In today's rapidly evolving threat landscape and healthcare organizations being prime targets for bad guys, you need someone actively watching your environment for threats and incidents 24x7x365. PatientLock MDR applies leading technology, deep analytics, machine learning, automation, and military-grade threat intelligence to streamline the volume of data feeds created by devices in your environment.

This unparalleled visibility allows our analysts to cut through the noise, reducing false positives and alert overload to find what really matters – in real time. To see the work we're doing on your behalf, customers can access activity views through our dedicated and secure customer portal.

Once an incident is identified, minutes matter. We provide fast remediation and/or actionable guidance to address threats before they cause damage to your business or patients, and reinforce gaps in your defenses so attackers can't exploit an attack vector again.

Protect

Our team of security experts is laser focused on protecting your organization and assets 24x7x365, freeing you to focus on patient care.

Detect

Powerful, integrated technologies, machine learning, and military-grade threat intelligence help our analysts identify malicious activity faster.

Respond

Once a critical threat is identified and contained, we then close any gaps needed to mitigate future exploitation.

PatientLock MDR stands vigilant to defend your business so threats won't get in your way.
